

ANALYTICS/RESEARCH:

Tasked with researching similar projects for “best practices”, researching various “footprint” scenarios for campus layout, various interior traffic flow patterns, various interior sanctuary and pew configurations, various building types including materials and structure design, various materials to be used for building – interior and exterior, various ADA compliance alternatives/requirements and various HVAC, sound, lighting, security systems. Cherishing each of the Canton Parishes’ legacies this team will interface with Design, Construction and Finance Teams.
